

**SUN WEST**  
SCHOOL DIVISION

*Success for all*

Media Release  
January 23, 2017  
For Immediate Release

## **Sun West School Division Engaging Public About Personalized electronically Blended Learning (PeBL) Initiative**

Sun West has launched an online learning process called Thoughtexchange to engage our community in a process to educate and receive feedback about Personalized electronically Blended Learning (PeBL) in the Sun West School Division. Please watch this brief video about PeBL (<https://youtu.be/63KlVPclbr4> )

Two questions will be provided after viewing the background video:

1. What are your thoughts about Personalized electronically Blended Learning (PeBL) in Sun West School Division?
2. What questions do you have for us about Personalized electronically Blended Learning (PeBL) in Sun West School Division?

Thoughtexchange uses open-ended questions to gather a broad range of perspectives and we encourage everyone to contribute their Thoughts. It is only by understanding all perspectives that we can best serve the needs of our students.

A little bit about the Process:

- It is a *three-step* process. Stakeholders begin by sharing their Thoughts. Then they review and star the Thoughts of others before discovering what the community values.
- The process is *confidential*. The names and email addresses of participants will never be publicly associated with a Thought or response. However, participants will see each other's Thoughts.
- If the school has a parent or community member's email address, they will receive a *customized invitation*. If they don't receive an invitation, they can visit the following page to self-register for the conversation - <http://signup.thotex.com/sunwestsd/Ksy>
