Sport/Physical Activity Handbook

This handbook is intended for use for curricular and extra-curricular activities. All activities in this handbook, including those labeled as high risk activities, have been approved for use in Sun West Schools. Any Activities not listed not listed in this handbook would require special permission by the school administration prior to conducting the activity. The School Athletic Director would be the first person contact if there are questions regarding expectations in this handbook.

Guidelines, although helpful, should never replace common sense and the expected standard of care within the school division. It is expected that the general guidelines outlined in the document be in place if an activity is occurring in a school.

As outlined in Administrative Policy 250 Physical Activity, and to ensure compliance to these guidelines, it is recommended that all staff members review this document as it applies to them at the beginning of each school year.

Facilities

1. Ensure that the perimeter of the gym and/or activity is free of obstacles before commencing an activity.
2. Modify the rules of play as needed for maximum safety when using facilities that do allow for regulation sized basketball, volleyball courts etc. and/or have low ceilings.
3. When a gym or activity has immovable obstacles (i.e., doors or radiators under basketball baskets, protruding drinking fountains) modify the rules of play as needed.

Equipment

1. Check that personal equipment (i.e., helmets, skates, skis, padding, etc.) fits properly and is appropriate to the skill level of the individual.
2. Encourage students to report all equipment problems to the appropriate individual.

Instruction

1. Teach skills for specific activities in appropriate progression. Refer to the appropriate resources for detailed information about skills progression.
2. Base activities on skills that might have been taught.
3. Never require a student to perform a skill beyond his or her capabilities. When a student displays hesitation verbally or non-verbally, the teacher should discuss the reason(s) for doubt with the student. If the teacher believes that a potential hesitancy concerning the skill could put the student at risk, the student should be directed toward a more basic skill.
4. Modify the rules for specific activities to suite the age, strength, experience and abilities of students. When students are physically challenged, rules, equipment and playing area may require major modification.
5. Allow a warm-up and cool-down period for all activities.
6. Do not use walls and stages in gyms and activity rooms for turning points or finish lines. Designate a line or pylon in advance of the wall as the finishing line or turning point.
7. Students should learn how to prevent, recognize and treat sunburn, frostbite and hypothermia.
8. The supervisor of any off campus activities should have access to a cell phone in case of emergencies.

Supervision

1. Establish routines, rules of acceptance behavior and duties of students at the beginning of the year and reinforce them throughout the year. Teachers/Supervisors should sanction students for unsafe play or unacceptable behavior whenever it occurs and should encourage safe play at all times.
2. Make students aware of the rules of specific activities or games before play begins and enforce the appropriate type of supervision.
3. Make students aware that the use of equipment or the use of the gymnasium is prohibited without the appropriate type of supervision.
4. Become familiar with your students' medical history and physical limitations.
5. Teach students appropriate behavior when an accident occurs – stand back, do not move the injured person and get to a responsible adult immediately.
6. Three levels of supervision are referred to in the specific sport guidelines:
 - **“Constant visual supervision”** means that the teacher/supervisor is physically present, watching the activity in question.
 - **“On-site supervision”** means that the teacher/supervisor is present but not necessarily constantly viewing one specific activity.
 - **“In- the- area supervision”** means that the teacher/supervisor could be in the gymnasium while another activity is taking place in an area adjacent to the gymnasium.

Clothing and Footwear

1. Recommend to the students the wearing of sun protection for summer and winter activities. Sun protection should be appropriate for the sport and the weather and can include sunscreen, protective clothing, hats and sunglasses.
2. Wear clothing and footwear that is appropriate for the activity, the weather, the surface, and the age and skill level of the student.
3. Jewelry should be removed as deemed necessary by the rules and/or supervisor.

GYMNASTICS (GENERAL GUIDELINES)

LEVEL	➤ Kindergarten to Grade 12
SUPERVISION	<ul style="list-style-type: none"> ➤ The Basic Movement Pattern (BMP) approach to gymnastics used in the Saskatchewan physical education curriculum is such that safety considerations are built into the program. By teaching landings, one of the basic movement patterns, teachers prevent injuries. Many injuries that occur in a gymnastics context, and in other physical activities, are the result of landing incorrectly. Teach students how to land safely in a variety of situations and have students practice landings regularly so they are learned to the point of becoming reflex reactions. ➤ Spotting, manual assistance provided to participants while performing skills on the floor or on equipment, is not appropriate in the elementary gymnastics program. Many gymnastics injuries are the result of attempting skills that students are not ready to perform. If the student needs spotting, this is a good indication that the student lacks the necessary physical or motor skills. Rather than have the student attempt the skill with a “spot”, more activities that lead up to the skill can be provided. Not only does this approach prevent the tendency for students to become dependent on a spotter, it reflects the reality that in a large group setting the teacher cannot spot all the students. ➤ Don't force students to perform skills that are beyond their level of ability. When a student displays hesitation, verbally or non-verbally, discuss the reason(s) for doubt with the student. After the discussion, if the teacher believes that a potential hesitancy during the performance of the skill could put the student at risk, the student can be directed toward a more basic skill. ➤ Mat work comes before use of equipment. A teacher who is unfamiliar with any gymnastics equipment can seek assistance from appropriate staff and/or refrain from using the equipment until help is received. ➤ Skills are best taught in a logical progression from simple to complex. Students who demonstrate control of basic movement patterns are ready to go on to more complicated skills. For example, a landing on the feet should be performed with control on the floor before working on an elevated surface such as a box horse. ➤ Aerial somersaults may be done at grades 9-12, <u>only</u> if students are ready for the progression. ➤ Regular in-services need to be encouraged for staff members who teach this.
EQUIPMENT	<ul style="list-style-type: none"> ➤ PARALLEL BARS, HIGH BAR, STILL RINGS, UNEVEN PARALLEL BARS, FLOOR, BALANCE BEAM, POMMEL HORSE, VAULTING HORSE, ROPES. ➤ Inspect equipment on a regular basis and repair as necessary. No springboards. ➤ Teacher's responsibilities include a safety check for proper set-up and to ensure all locking mechanisms are locked prior to use. ➤ Use general utility mats: <ul style="list-style-type: none"> • ensolite 3.8 cm (1 ½") • trocellen 5.1 cm (2") • ethefoam 3.8 cm (1 ½") • sarneige 3.8 cm (1 ½") • mats of equivalent compaction rating

	<ul style="list-style-type: none"> ➤ Don't use 30.5 cm – 60.9 cm (12" – 24") thick mats as a landing surface for vaulting or for controlled landings (i.e., landing on feet) off any piece of equipment. ➤ Use landing mats that are 10 cm (4") or greater when the student is in an elevated, inverted body position. ➤ For initial attempts of inversion-type moves on any apparatus use a 30.5 cm – 60.9 cm (12" – 24") mat.
FACILITIES	<ul style="list-style-type: none"> ➤ Situate mats around/under apparatus as a landing area so that there is no overlap or open space. ➤ Take precautions to minimize the movement of mats on impact. ➤ Attach Velcro mats. ➤ Allow sufficient space between apparatus to allow free movement and space to dismount.
SPECIAL RULES/ INSTRUCTION	<ul style="list-style-type: none"> ➤ Instruct students on safety related to gymnastics and all associated apparatus prior to using any equipment. ➤ Be aware of the physical limitations and initial skill levels of students. ➤ Do not encourage students to perform skills beyond their physical and psychological capabilities. ➤ Teach skills in proper progression. ➤ Bare feet are acceptable.
